Re: Granville Solvents Site

Kevin:

I have a couple of questions in regard to your response dated March 8, 2005 to my email to you. I think that it would be a good idea to have a conference call or some discussion with OEPA regarding the upcoming work at the site. Metcalf & Eddy has shut off the treatment systems and will drain pipes and lines and secure the treatment buildings this week. Within the next few weeks we should complete all aspects of the shutdown and initiate a preventative maintenance program and schedule the first round of semi-annual groundwater sampling. We would like to be sure that we have addressed all concerns related to this phase of the work before proceeding too much further. In addition, if US EPA and Ohio EPA do perform a 5-year site review, we would like to discuss it and participate in that process.

We will forward a quarterly report to you and Ohio EPA at the end of March as a part of the O&M program that we have implementing over the last 2 years. However, after March all treatment will be suspended and we will begin groundwater monitoring on a semi-annual basis instead of quarterly. Thereafter we will submit annual groundwater monitoring reports to the Agency as prescribed in the treatment suspension proposal submitted to your office. As you are aware, quarterly groundwater sampling is scheduled for this month. However, we would request that we not collect those samples, but instead, collect the first round of semi-annual samples after the new monitoring well is installed and purged next month. Please let me know if the Agency agrees.

Finally, we will install the new monitoring well within the next month. At that time, the treatment systems will be shut off but we will need to dispose of drill cuttings and purge water. Would it be acceptable to dispose of both on site as non-hazardous materials?

I will talk with Granville Village officials this week concerning a Brownfield grant for the site.

Thanks for your continuing help and support on this project. Call me with any questions.

Regards,
